

Indigita has Published a New e-Learning Course on Internal Audit in the Financial Sector

Geneva, 1st October 2024 - **Indigita SA has launched a new e-Learning course titled Internal Audit, designed to enhance the understanding and appreciation of internal audit functions across various industries such as the financial industry. Developed with Draginja Waser, certified auditor and coach, this course equips professionals to work effectively with internal auditors, whether collaborating with audit teams or applying audit principles in daily operations.**

Internal audit plays a vital role in protecting an organization's integrity, improving operational efficiency, and ensuring compliance. However, it is often misunderstood or seen as merely a compliance function. This course aims to change that perception by demonstrating the real value internal auditors bring to an organization, such as identifying risks, enhancing governance, and driving continuous improvement.

In this course, participants will be guided through the following chapters:

- **Introduction to Internal Audit:** Covers the importance of internal audit for corporate governance and the key functions of an audit assistant.
- **Why Internal Audit?:** Explores the necessity of internal audit for risk management, compliance, and operational efficiency, highlighting its role in corporate success.
- **Foundations of Internal Audit:** Provides a detailed look at the purpose and mission of internal audit, including regulatory requirements and ethical considerations.
- **Internal Audit Processes and Methodology:** Walks through the audit process, from planning to execution, reporting, and follow-up, offering hands-on knowledge through case studies.
- **Collaboration and Communication:** Focuses on effective strategies for working with auditees, fostering collaboration between audit teams and the broader organization.

This course is ideal for professionals across various industries who want to deepen their understanding of internal audit, allowing them to better support internal auditors and contribute to an organization's success.

The course takes approximately 60 minutes to complete and concludes with a final assessment to validate participants' learning progress. Upon completion, participants will receive a certificate recognized by SAQ – Swiss Association for Quality.
