

Indigita has Published a New e-Learning Course on Cybersecurity and AI

Geneva, 7th October 2024 - **Indigita SA has published a new e-Learning course on Cybersecurity and AI. This new course aims to address the rapidly growing threat of AI-driven cyberattacks and equips participants with the skills to detect and prevent such threats effectively. The training is recognized by the SAQ Swiss Association for Quality.**

As artificial intelligence technology continues to advance, so do the methods used by cybercriminals to exploit it. Financial professionals face unprecedented challenges in securing their organizations against these AI-enhanced threats. Indigita's new course provides essential tools and strategies to address these evolving risks.

What participants will gain from the course:

- **In-Depth Understanding of AI:** Participants will explore the fundamentals of AI and generative AI, learning how these technologies create realistic and potentially harmful content, from images to text and beyond.
- **Recognize and Counter AI-Driven Threats:** The course covers practical examples of how AI is used in cyberattacks, including:
 - Enhanced techniques for social engineering and impersonation
 - Optimized malware and discovery of network vulnerabilities
 - Conducting disinformation campaigns and creating synthetic identities
- **Develop Effective Cybersecurity Strategies:**
 - Strengthen your organization's cybersecurity measures against AI-driven threats
 - Implement AI tools for effective fraud prevention
 - Enhance risk management protocols and reinforce the importance of reporting suspicious activities

The course is designed for quick completion, taking approximately 45 minutes, and concludes with a final assessment to verify learning progress. Participants will receive a certificate upon successful completion.
